## PROFESSIONAL SUMMARY

---

Recent Computer Science graduate with hands-on skills in Python, Full Stack Development, AI, Machine Learning, HTML, CSS, JavaScript, and SQL. Experienced in building real-world projects and web applications. Strong problem-solving, analytical, and teamwork skills with a passion for learning new technologies. Eager to contribute through consistent effort, curiosity, and collaboration in an entry-level software engineering role.

## EDUCATION

---

**T.John Institute Of Technology, Bangalore (VTU)**

Bachelor of Engineering – Computer Science

Bangalore, India

Dec 2022 – May 2026

## EXPERIENCE

---

**SkyllX Training Center**

Feb 2026 – Present

Python Full Stack with AI (Training)

Bangalore, India

- Undergoing training in Python from basic to advanced concepts including data types, control statements, functions, and data structures.
- Working on practical exercises and projects to strengthen programming, problem-solving, and full-stack development skills.

**Cisco**

Oct 2025

Python Developer Intern

Bangalore, India

- Learned Python fundamentals including variables, loops, functions, and data structures.
- Built small Python projects independently to apply and improve programming skills.
- Worked on hands-on ML projects: vehicle performance analysis, potato leaf disease detection, churn analysis, and diabetes prediction.
- Gained practical experience in Python and fundamental machine learning workflows.

## PROJECTS

---

**Text Sentiment Analysis Using Movie Reviews**

- Developed an AI-powered sentiment analysis web application that classifies movie reviews into Positive, Negative, or Neutral sentiments using Natural Language Processing (NLP).
- Implemented text preprocessing techniques including tokenization, stop-word removal, and sentiment prediction using the NLTK VADER sentiment analyzer to improve classification accuracy.

**PDF Question Answering System using Generative AI**

- Built an AI-powered PDF Question Answering System using Generative AI that enables users to upload PDF documents and ask questions in natural language.
- Retrieved relevant information from documents to generate accurate, context-aware answers using Retrieval-Augmented Generation (RAG) techniques.

**AI-Powered Chatbot**

- Developed an AI-powered chatbot capable of responding to user queries using Natural Language Processing (NLP).
- Implemented intent recognition and response generation to simulate human-like conversation.

## TECHNICAL SKILLS

---

**Programming:** Python, JavaScript, SQL

**Web Development:** HTML, CSS, JavaScript, Django, React

**Data and ML:** Pandas, NumPy, Machine Learning

**Tools:** Git, GitHub
